

THE FACTS

Is RollRazor a Fit for your Operation?

RollRazor is...

- ✓ A roll cut-down machine
- ✓ Designed for 1-3 cuts/roll
- ✓ For high production environments
- ✓ Currently offered in North America & Europe

It has

- ✓ The lowest electricity costs (13¢) per ton
- ✓ 72% Lower labor costs than slitter/rewinder
- ✓ The lowest cost per converted ton (under \$10/ton)
- ✓ The highest production per hour (up to 4+ rolls)

It also

- ✓ Maintains the original mill wind
- ✓ Maintains original sheet orientation
- ✓ Produces rolls with 99.99966% runability
- ✓ Converts all rolls to 1st line quality
- ✓ Cuts rolls without creating heat
- ✓ Eliminates roll order setup time
- ✓ Cuts rolls up to 132" wide (3400mm)
- ✓ Cuts as narrow as 10" wide (254mm)
- ✓ Makes a single cut in 3 minutes (50" dia.) (1270mm)
- ✓ Produces quick-turn orders
- ✓ Cuts the lowest basis weights (1-ply bath)
- ✓ Eliminates the need to purchase cores
- ✓ Converts the widest variety of rolled products (Cigarette, tissue, towel, paper, board grades, etc.)

RollRazor is *not*...

- ✗ A slitter/rewinder
- ✗ A mobile unit
- ✗ A contract converting service

It does not

- ✗ Unwind & rewind rolls
- ✗ Change the diameter of a roll
- ✗ Change a core in a roll
- ✗ Make cuts less than 1" wide (25mm)
- ✗ Cut rolls over 60" in diameter (1524mm)
- ✗ Cut rolls 90+" wide in the center (2300+mm)
- ✗ Convert tapes & adhesive grades

Not best suited for

- ✗ Making several cuts on each roll
- ✗ Salvaging wet, damaged, low quality rolls
- ✗ Small volumes of work
(not as cost effective under 500 tons/mo.)
